BABYLONIAN CUNEIFORM

DAVE RICHESON

To create Babylonian cuneiform numerals you must download the babyloniannum package at

http://www.ctan.org/tex-archive/macros/xetex/latex/babyloniannum

You must also download and install the Santakku font from

http://www.hethport.uni-wuerzburg.de/cuneifont

Recall that the numbers 1 through 59 are written additively using the symbols

$$\text{Ì} =1 \text{ and } \text{Ã} =10.$$

For example 47 is written

This package is extremely easy to use. To obtain the symbols above type

`\Bnum{47}`

Larger numbers are written in base 60, and this package will do the decomposition for you. For example,

$$1234567890 = 1 \cdot 60^5 + 35 \cdot 60^4 + 15 \cdot 60^3 + 35 \cdot 60^2 + 31 \cdot 60^1 + 30 \cdot 60^0.$$

and

`\Bnum{1234567890}`

produces
